

Can I create charts about ChangeMan ZMF with ASR?

- [<CMN/ZMF Reporting>](#)

Creating charts with ASR is straight forward: all you have to do is to request the ASR output to be formatted as an ASR basket, which is like a CSV (comma separated values) file. You can then download the ASR basket to your PC, e.g. using the "transfer" utility that comes with ASR, which actually uses ISPF's Workstation Agent (WSA).

After the ASR basket (a CSV file) is downloaded, you can open it with any CSV-compliant editor, e.g. to create charts from it. Note that ASR is shipped with many chart-samples also.
