

AbitMORE SCM Commander - Built-in solutions

Here are some samples of built-in solutions that come with ASC (out-of-the-box):

- Resolve audit errors like a synch12.
- Verify authorizations for a given user ID and ChangeMan ZMF application ID.
- Remove/update approval entities in application admin (+ retrofit in existing packages).

These are just some of the available solutions. Below is an additional list that actually provides many more details for each of the solutions mentioned. Enjoy exploring the (always growing) list of built-in solutions below ...

Note: use the search box below to narrow down this list (e.g. by category).

Updated	Built-in solution	Summary:	Category
22/02/2014 - 19:21	Change the creator Id of a package	Change the creator ID of a change package to another userid, something that is typically done for none-BAS packages created by somebody who left the company.	<CMN/ZMF Helpdesk>
18/10/2013 - 18:57	Verify/alloc/delete of BAS- PROM- or PROD DSNs	Create a set of baskets for a single application (alternative: for all applications). Each basket contains all DSNs defined in application administration as production DSNs, baseline DSNs or promotion DSNs.	<CMN/ZMF Application Administration>
15/10/2013 - 10:36	Recreate xNode DSNs for selected frozen pkgs	Submit a request to recreate the X-node DSNs for all frozen packages, optionally limited to only those packages that contain components of a specific library type.	<CMN/ZMF Application Administration>, <CMN/ZMF Helpdesk>
15/10/2013 - 10:30	Update install date for all expired packages (limbo)	Mass update the planned install date of all change package with "install date passed" to the new (future) install date.	<CMN/ZMF Helpdesk>, <CMN/ZMF Production Control>

Updated	Built-in solution	Category
15/10/2013 - 10:28	Synchronize DEV staging library list with catalog	Summary: Verify and correct discrepancies between the zOS catalog and the staging DSNs registered in CMNPMAS as allocated. <CMN/ZMF Helpdesk>
