Summary: List all planned packages baselined on the day they were created.

A **planned** package that was baselined (= installed in production) on the same day that it was created? Seems like something is wrong with the "planning" here. Or is it maybe because such package creators are looking for ways to not show up on the radar(s) related to unplanned packages?

Report ID: PKGBASPL

Report Specs:

```
ASR1      - AbitMORE® SCM Reporting > Edit rpt   > Fields   9 field(s) selected
Command ===>                                              Scroll ===> CSR

 Report Id:  PKGBASPL  Description: PLND pkgs CRE+BAS same day
 Alias name      ===> _____                         User Auth: P
 Report category ===> AUD_____     Security entity  ===> _____
 Report panel    ===> ASRV015_
 Field connector ===> AND (And,Or)    Remove duplicates ===> YES (Yes,No)

 Valid line commands:  A fter, B efore, M ove, I nsert, D elete

Enter END to save, ENTER to continue or CANCEL to exit.

Report Variables:

The available report variable **#RPTV_START_DATE** allows for limiting the list of packages to only those created on or after a specific date (e.g.: the date the release management process was introduced ?).
