

Never promoted frozen packages

- [<Built-in Reports>](#) |

- [<CMN/ZMF Release Management Dashboard>](#)

Summary: Visualize the applications with FRZ packages that have never been promoted to any promotion target.

A frozen package implies that the package is waiting approvals, and ready to be shipped to production. It's a common business practise to only allow package in FRZ status to be promoted to the highest level(s) of promotion (like to a QA environment). But if a FRZ package has not ever been promoted to any promotion target, what environment would have been used to for unit testing or integration testing?

Report ID: PPNOPRM

Report Specs:

```
ASR1 - AbitMORE® SCM Reporting > Edit rpt > Fields 4 field(s) selected
Command ===> Scroll ===> CSR

Report Id: PPNOPRM Description: Never promoted FRZ pkgs (bsk)
Alias name ===> _____ User Auth: P
Report category ===> QAV_____ Security entity ===> CMN_REVR
Report panel ===> _____
Field connector ===> AND (And,Or) Remove duplicates ===> YES (Yes,No)

Valid line commands: A fter, B efore, M ove, I nsert, D elete

Enter END to save, ENTER to continue or CANCEL to exit.
```

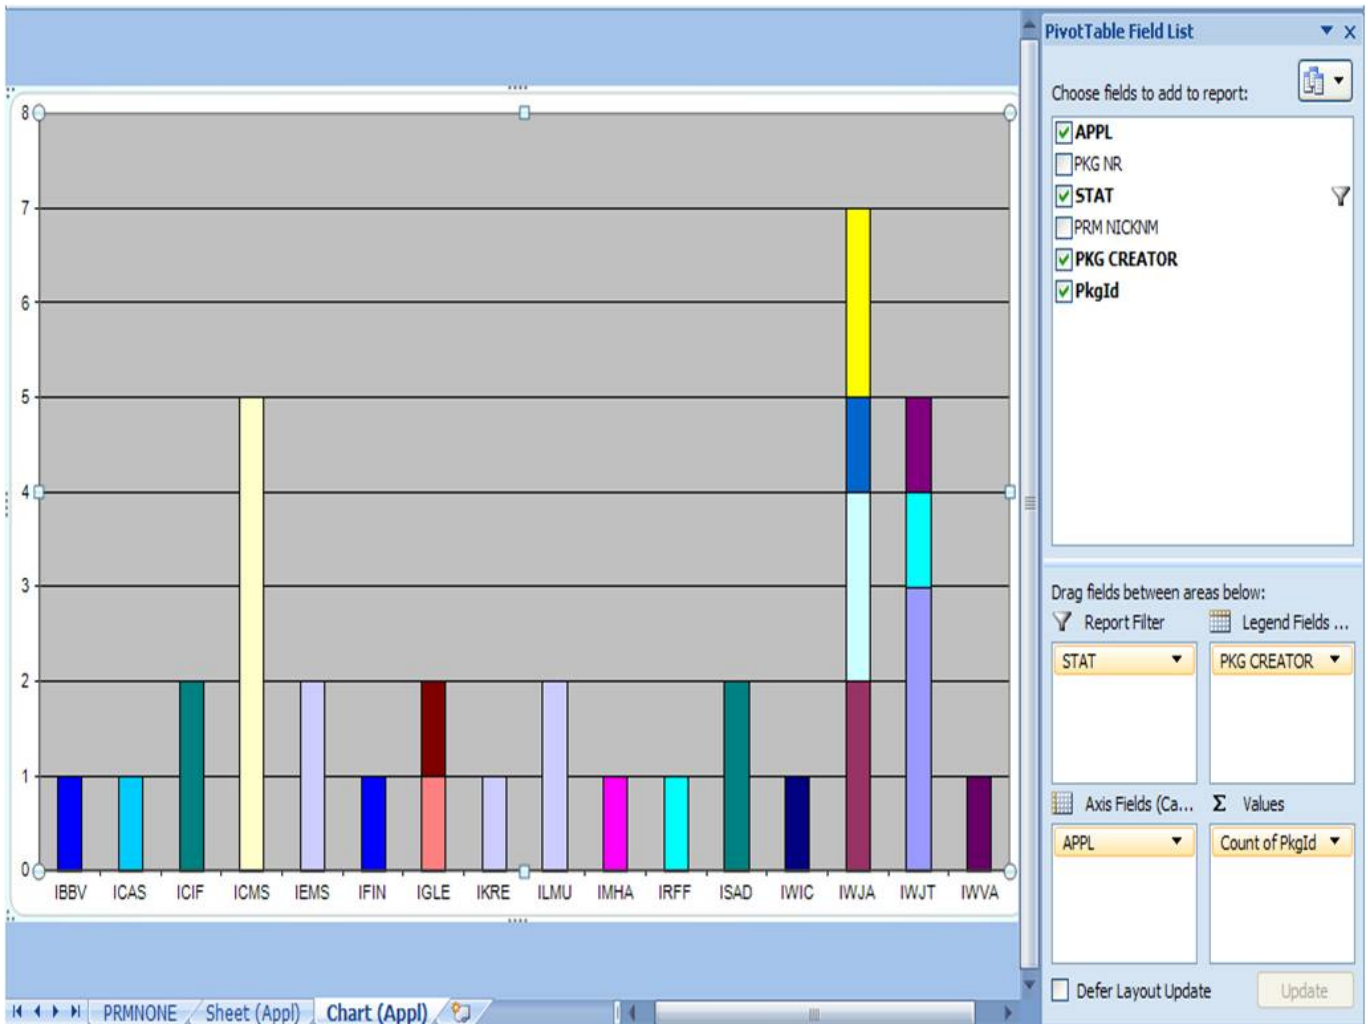

Cmd	Column name	Oper	Value	Ord	Grp
-	APPL-PKGID_____	-	_____	A	-
-	STA_____	EQ	FRZ_____	-	-
-	- PRM NICKNM_____	EQ	&NULL_____	-	-
-	PKG CREATOR_____	-	_____	-	-

```
***** Bottom of data *****
```

Report Variables:

Because of the nature of this report, it doesn't have/require any report variables.

Report Output:

This graph shows the number of such FRZ packages by application, it seems like there are a few applications that are worth further investigation (about which environment they use to perform their actual testing). By swapping the **APPL** and **PKG CREATOR** data the graph reveals similar data by package creator ...

Note: the above graph was created by asking for saving the report in basket format (a kind of CSV format), and then downloading or eMailing the report output to a workstation. On the workstation it was opened in a spreadsheet application that accepts CSV files to read from, after which some standard graphing features were applied to build the chart.
